Preface	xi
List of Notations	xv
List of Acronyms	xxi
Part I Theory	
1. INTRODUCTION	3
1.1 The main problem	3
1.2 Some existing approaches to optimality conditions and numerical methods	5
1.3 Existence of solutions	10
2. AUXILIARY RESULTS	13
2.1 Selected topics from set-valued analysis	13
2.2 Lipschitz analysis	20
2.3 Conical approximations and optimality conditions	33
2.4 Projection onto polyhedral sets	37
Bibliographical notes	42
3. ALGORITHMS OF NONSMOOTH OPTIMIZATION	43
3.1 Conceptual idea	43
3.2 BT-algorithm: the convex case	47
3.3 BT-algorithm: the nonconvex case	61
3.4 Nonsmooth Newton's method	65
Bibliographical notes	68
4. GENERALIZED EQUATIONS	69
4.1 Equivalent Formulations	70
4.2 Existence and uniqueness	78
Bibliographical notes	83
5. STABILITY OF SOLUTIONS TO PERTURBED GENERALIZED EQUATIONS	85
5.1 Analysis of the implicit map	85
5.2 Generalized equations with polyhedral feasible sets	89
5.3 Admissible sets of particular interest	92
Bibliographical notes	102

6. DERIVATIVES OF SOLUTIONS TO PERTURBED GENERALIZED EQUATIONS	103
6.1 Directional derivatives	103
6.2 Generalized Jacobians	113
6.3 Semismoothness	120
Bibliographical notes	122
7. OPTIMALITY CONDITIONS AND A SOLUTION METHOD	125
7.1 Optimality conditions	126
7.2 The solution method	134
Bibliographical notes	147
Part II Applications	
8. INTRODUCTION	151
8.1 Optimum shape design	151
8.2 Economic modelling	153
9. MEMBRANE WITH OBSTACLE	155
9.1 State problem	155
9.2 Packaging problem with rigid obstacle	163
9.3 Packaging problem with compliant obstacle	170
9.4 Incidence set identification problem	172
10. ELASTICITY PROBLEMS WITH INTERNAL OBSTACLES	181
10.1 Linear elasticity problem	181
10.2 Design of elastic-perfectly plastic structures	191
10.3 Design of masonry structures	196
11. CONTACT PROBLEM WITH COULOMB FRICTION	203
11.1 Problem formulation	204
11.2 Numerical solution	205
11.3 Control of friction coefficients	211
12. ECONOMIC APPLICATIONS	217
12.1 The Cournot oligopoly	219
12.2 Generalized Nash equilibrium	226
Bibliographical notes	234
Appendices	237
A—Cookbook	239
A.1 Problem	239
A.2 Assumptions	239
A.3 Formulas	240
B—Basic facts on elliptic boundary value problems	247
B.1 Distributions	247
B.2 Sobolev spaces	249
B.3 Elliptic problems	250

C—Complementarity problems	255
C.1 Proof of Theorem 4.7	255
C.2 Supplement to proof of Theorem 4.9	257
References	259
Index	269
